Notes to the abridged financial statements for the year ended 30th June 2025

1. Accounting policies

1.1. Accounting Convention

The financial statements are prepared on the going concern basis, under historical cost convention.

The company has taken advantage of the exemption in Financial Reporting Standard No.1 from the requirement to produce a cashflow statement on the grounds that it is a small company.

1.2. Compliance with accounting standards

The financial reporting framework that has been applied in their preparation is the Companies Act 2014 and Accounting Standards issued by the Financial Reporting Council.

1.3. Turnover Policy

Turnover represents the total invoice value, excluding value added tax, of sales made during the year.

1.4. Tangible fixed assets and depreciation

Tangible fixed assets are stated at cost less accumulated depreciation. Cost includes all costs that are directly attributable to bringing the asset into working condition for its intended use.

Depreciation

Depreciation is provided on all tangible fixed assets, at rates calculated to write off the cost less residual value, of each asset systematically over its expected useful life.

1.5. Stock

Stock is valued at the lower of cost and net realisable value. In the case of finished goods and work in progress, cost is defined as the aggregate cost of raw material, direct labour and attributable proportion of direct production overheads based on a normal level of activity. Net realisable value is based on normal selling price, less further costs expected to be incurred to completion and disposal.

1.6. Leasing and hire purchase commitments

Assets obtained under hire purchase contracts and finance leases are capitalised as tangible assets and depreciated over the shorter of the lease term and their useful lives. Obligations under such agreements are included in creditors net of the finance charge allocated to future periods. The finance element of the rental payment is charged to the profit and loss account so as to produce constant periodic rates of charge on the net obligations outstanding in each period.

1.7. Taxation

The yearly charge for taxation is based on the profit for the year and is calculated with reference to the tax rates applying at the balance sheet date.
