MASOM HEALTHCARE SERVICES LIMITED

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2024

GENERAL INFORMATION

Ebony Consult is a limited liability Company incorporated and domiciled in the Republic of Ireland. The financial statements as at and of the year ended 31 March 2024 comprise the individual statements of the company.

1.0 Statements of accounting policies

The following accounting policies have been prepared applied consistently in dealing with the items which were considered in relation to the company's financial statements

1.1 Statement of Compliance

The financial statements have been prepared under the historical cost convention with accounting standards generally accepted in Ireland and the statute comprising the Companies Act 2014. Accounting Standards generally accepted in Ireland in preparing financial statements giving a true and fair view are those issued by the Accounting Standards Board and those published by the Auditing Practices Board.

1.2 Basis of Measurement

The financial statements have been prepared under the historical convention.

1.3 Fixed Assets

Tangible fixed assets are carried at cost less accumulated depreciation and provisions for impairment. The cost of an asset is made up of the purchase price of the asset plus any costs directly attributable to bringing the asset into working conditions for its intended use.

Assets under construction are carried at cost less any impairment, loss if any. Legal fees are also included in cost. Borrowing costs are capitalized for assets that need substantial time to prepare the asset for its intended use or sale. As the depreciation method used for other fixed assets, depreciation of such assets begins when they are available for use.

Gains or loss arising on the disposal or retirement of an item of property and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in the comprehensive income statement.

1.4 Depreciation

Depreciation is charged so as to write off the cost or valuation of assets, other than land and properties under construction. It is provided on all tangible fixed assets at rates write off or the valuation less estimated residual value, of each asset systematically over its expected useful life.

Assets acquired under finance lease are depreciated over their expected useful lives on the same basis as owned assets or where shorter, the term of the relevant leases.

The following annual rates of depreciation were applied:

Fixtures, Fittings	15%
Motor vehicle	25%
Leasehold Land and Building	3%
Computer and Software	33.3%
Equipment	15%

1.5 Impairment of fixed assets

The carrying value of intangible and tangible fixed assets is reviewed for impairment if events or changes in circumstances indicate that the carrying amount value may not be recoverable. Under the IFRS, impairment is assessed by comparing the carrying value of an asset with its recoverable amount (being the higher of net realizable value and value in use). Net realizable value is therefore defined as the amount at which an asset could be disposed of net of any direct selling costs. Value in use is defined as the present value of the future cash flows obtainable through continued use of the assets including those anticipated to be realized on its eventual disposal.

2.1 Revenue

In the opinion of the directors, the disclosure required by paragraph 41 of the Schedule to the Companies Act 1963 - 20214 would be seriously prejudicial to the interests of the company and the directors have availed of the exemption contained within paragraph 41 section 5 of Schedule to the Companies Act.

2.2 Revenue Recognition

Turnover represents the total invoice value, excluding value added tax and trade discounts, of sales made during the year. Turnover is recognized on invoice basis. The revenue is measured at fair value of the consideration received or to be received.

2.3 Inventory

Inventories consists stock at various shops at the end of the financial year. Inventories are measured stated at the lower of cost and net realizable value. Cost of inventories is the sum of all costs of purchases, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

Average cost method is applied in the calculation of cost inventories. Net realization value represents the estimated selling price less all estimated costs of completion and costs necessary to make a sale.

2.1 Use of Estimates and Judgment

The preparation of financial statements in conformity with IFRSs requires Management to make judgment, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities, income and expenses. The estimates and the associated assumptions are

based on historical experience and other factors that are reasonable under the circumstances, the results of which form the basis of making the judgment about the carrying amounts of assets and liabilities that are not readily apparent from the other sources. Actual results may differ from these estimates.

2.2 Interest Income and Expense

Interest income and expenses are recognised in the statement of income for all instruments measured at amortised cost using the effective interest method.

The effective interest method is a method of calculating the amortised cost of a financial asset or a financial liability and of allocating the interest income or interest expense over a relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, the Company estimates cash flows considering all contractual terms of the financial instrument but does not consider future credit losses. The calculation includes all fees paid or received between parties to the contract that are an integral part of the instrument. Once a financial asset or a group of similar financial asset has been written down as a result of an impairment loss, interest income is recognised using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss.

2.3 Translations of Foreign Currencies

The Company's functional currency is the Euro (€). In preparing the balance sheet of the Company, transactions in currencies other than Euro (€) are recorded at the rates of exchange prevailing on the dates of the transactions. At each balance sheet date, monetary items denominated in foreign currencies are retranslated at the rates prevailing at the balance sheet date. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing on the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated. Exchange differences arising on the settlement of monetary items, and on the retranslation of monetary items, are included in the statement of income. Exchange differences arising on the retranslation of non-monetary items carried at fair value are included in the statement of income for the period except for differences arising on the retranslation of non-monetary items in respect of which gains and losses are recognised directly in stakeholder's equity. For such non-monetary items, any exchange component of that gain or loss is also recognised directly in the stakeholders' equity.

2.4 Cash and Cash Equivalents

For the purpose of cash flow statement cash and cash equivalents include cash and short-term government securities maturing in the months or less from the date of acquisition.

2.5 Leases

The Directors of Ebony Consult Ltd have adopted the tenets of IRFS 16 and the recognize all leases as finance except those with tenor of one year or less with low value that will recognized immediately within the financial of the lease.

2.6 Provision

Provisions for restructuring costs, legal claims and similar events are recognised when: the Company has a present legal or constructive obligation as a result of past events; it is more likely that an outflow of resources will be required to settle the obligation; and the amount has been reliably estimated.

2.7 Deferred Taxation

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amount in the financial statements. Deferred income tax is determined using rates [and laws] that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realized or the deferred income tax liability is settled.

A deferred tax asset is recognized only to the extent that it is probable that future taxable profits will be available against which the asset can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

2.8 Current Taxation

The Company provided for income taxes at the current tax rates on the taxable profits if the Company.

Current tax is the expected tax payable on the taxable income for the year, using tax rates [and laws] that have been enacted or substantially enacted by the balance sheet date, and any adjustment to tax payable in respect of previous years.

2.9 Dividends on Ordinary Shares

Dividends on ordinary shares are recognised on equity in the period in which they are approved by the Company's shareholders.

Dividends for the year that are declared after the balance sheet date are dealt with in the subsequent events notes.

Interim dividends are recognised when paid.

2.10 Borrowings

Borrowings are recognised initially at fair value, net of transaction costs incurred. Borrowings are subsequently stated at amortised cost. Any difference between the amount initially recognised [net of transaction costs] and the redemption value is recognised in the income statement over the period of the borrowings using the effective interest rate method.

Borrowings are classified as non-current liabilities where the Company has an unconditional right to defer settlement of the liability for at least 12 months after the balance sheet date.
