1. Accounting policies and measurement bases

Basis of preparation

The financial statements have been prepared on a historical cost basis, as modified by the revaluation of certain financial assets and liabilities and investment properties measured at fair value through profit or loss.

The financial statements are prepared in Euro, which is the functional currency of the entity.

Turnover

Turnover is measured at the fair value of the consideration received or receivable for goods supplied and services rendered, net of discounts, and Value Added Tax.

Revenue from the sale of goods is recognized when the significant risks and rewards of ownership have transferred to the buyer, usually on dispatch of the goods; the amount of revenue can be measured reliably; the associated economic benefits will probably flow to the entity and the costs incurred or to be incurred in respect of the transactions can be measured reliably.

Assets

Tangible assets are initially recorded at cost and are subsequently stated at cost less any accumulated depreciation and impairment losses.

Any tangible assets carried at revalued amounts are recorded at the fair value at the date of revaluation less any subsequent accumulated depreciation and subsequent accumulated impairment losses.

An increase in the carrying amount of an asset as a result of a revaluation is recognized in other comprehensive income and accumulated in capital and reserves, except to the extent it reverses a revaluation decrease of the same asset previously recognized in profit or loss. A decrease in the carrying amount of an asset as a result of revaluation is recognized in other comprehensive income to the extent of any previously recognized revaluation increase accumulated in capital and reserves in respect of that asset. Where a revaluation decrease exceeds the accumulated revaluation, gains accumulated in capital, and reserves in respect of that asset, the excess shall be recognized in profit or loss.

Depreciation

Depreciation is calculated to write off the cost or valuation of an asset, less its residual value, over the useful economic life of that asset as follows:

Equipment	- 12.5% straight line
Motor vehicles	- 12.5% straight line

If there is an indication that there has been a significant change in the depreciation rate, useful life, or residual value of tangible assets, the depreciation is revised prospectively to reflect the new estimates.
